Members of organizing committee:

Nadiia Spodyniuk
Yuriy Yurkevych
Stepan Shapoval
Yuriy Furdas

The Conference is dedicated to the theoretical and practical issues of implementation of energy saving technologies in life-support systems of buildings.

CONFERENCE TOPICS:

- energy efficient building materials;
- energy efficient constructions of buildings;
- modern engineering methods of implementing the conception of "passive house";
- resource saving technologies of systems of ensuring the microclimate;
- alternative energy resources;
- use of recycled and low potential energy resources;
- heat-generating installations;
- energy audit, certification and thermomodernization of buildings;
- environmental protection in construction;
- rational use of fuel and energy resources;
- combined systems of heat providing of buildings.

INFORMATION FOR PARTNERS AND SPONSORS

Participation in the International Scientific and Technical Conference "EcoComfort" will allow you to present the latest developments and technologies of life-support systems of buildings. You will have the opportunity to make presentations to the audience, to demonstrate your products and present activities on promotional stands, to make an advertisement in the printed Conference materials. Conditions of partnership will be discussed separately. Information is available in the organizing committee of the Conference.
